Dirk Weissenborn

Curriculum Vitae

Professional Experience

since 2014 **Researcher**, *German Research Center for Artificial Intelligence*, Berlin.
- basic research on machine- & deep-learning for NLP
- project&development lead for project on neural information extraction with industry partner SAP funded by the Software Campus program
- researcher in various information extraction projects (entity linking, biomedical concept recognition, question answering)

2013–2014 **Student Assistent**, *Bioinformatics Group, BIOTEC, TU Dresden*, Dresden.
- research on relation discovery and question answering in the biomedical domain
- co-organization of first round of BioASQ challenge on biomedical question answering

2013 **Mentor for Google Summer of Code**, *Open Source Project DBpedia Spotlight*.

2012 **Student of Google Summer of Code**, *Open Source Project DBpedia Spotlight*.
- topical classification on Wikipedia

2011-2012 **Software Developer**, *T-Systems Multimedia Solutions*, Dresden.
- development of a recommender system for social network
- build management in software project

2008-2010 **Software Developer**, *AvatR*, Dresden.
- development of recommender system of personal agent for webservices

Education

since 2014 **PhD Student**, *German Research Center for Artificial Intelligence*, Berlin.
- deep learning architectures for NLP with special focus on information extraction
- neural memory architectures
- recurrent neural networks

2008–2014 **Diplom Informatik (equivalent M.Sc. Computer Science)**, *Technische Universität Dresden*, Dresden, 1.1 (with distinction, equivalent to first-class honors).
- *Specialization:* Intelligent Systems
- *Minor:* Mathematics

2000-2008 **Abitur**, *Goetheschule Ilmenau*, Ilmenau, 1.1.
- *Specialization:* mathematics and the sciences.

Turmstr. 36 – 10551 Berlin – Germany

Diploma thesis

Title	*Relation Discovery between Indirectly Connected Biomedical Concepts*
Supervisors	Dr. Georgios Tsatsaronis, Prof. Michael Schroeder
Description	In this thesis a novel approach for relation discovery in the biomedical domain is introduced. The approach is based on the combination of information extracted from structured and unstructured data, represented by a graph. The constructed graph allows for the easy integration of heterogeneous information and discovery of indirect connections between biomedical concepts using machine learning to identify characteristic graph path patterns.

Teaching

2016 **Supervision of Master Thesis**.
Clozing the Gap: Knowledge Base Population by Answering Cloze Queries

Awards

2012 **Scholarship of Germany ("Deutschlandstipendium")**.

2010–2011 **DAAD Scholarship**.
Scholarship for an exchange year abroad in Brazil

Software

GitHub	`https://github.com/dirkweissenborn`
MOOD	Open-source tool for joint entity linking and word sense disambiguation. Creator. `https://bitbucket.org/dfki-lt-re-group/mood`
DBpedia Spotlight	Open source tool for entity linking. Active member (2012 to 2013). `https://github.com/dbpedia-spotlight/dbpedia-spotlight`

Technical Skills

Programming Languages *in descending order of proficiency*
Python, Scala, Lua, Java, C++, C

Deep Learning Libraries
TensorFlow, Torch7

NLP Libraries
Spacy, FactorIE, NLTK, StanfordNLP

Languages

German	**Mother tongue**
English	**Fluent**
Spanish	**Fluent**
Portuguese	**Fluent**
