

Dirk Weissenborn

Curriculum Vitae

Professional Experience

- 2017 **Research Intern**, *DeepMind*, London.
 - integration of common-sense and background knowledge into neural natural language understanding systems
- since 2014 **Research Scientist**, *German Research Center for Artificial Intelligence*, Berlin.
 - basic research on machine- & deep-learning for NLP
 - project&development lead for project on neural information extraction with industry partner SAP funded by the Software Campus program
 - research in various information extraction projects (entity linking, biomedical concept recognition, question answering)
- 2013–2014 **Student Assistant**, *Bioinformatics Group, BIOTEC, TU Dresden*, Dresden.
 - research on relation discovery and question answering in the biomedical domain
 - co-organization of first round of BioASQ challenge on biomedical question answering
- 2013 **Mentor for Google Summer of Code**, *Open Source Project DBpedia Spotlight*.
- 2012 **Student of Google Summer of Code**, *Open Source Project DBpedia Spotlight*.
 - topical classification on Wikipedia
- 2011–2012 **Software Developer**, *T-Systems Multimedia Solutions*, Dresden.
 - development of a recommender system for social network
 - build management in software project
- 2008–2010 **Software Developer**, *AvatR*, Dresden.
 - development of recommender system of personal agent for webservices

Education

- since 2014 **PhD Student**, *German Research Center for Artificial Intelligence*, Berlin.
 - deep learning architectures for NLP with special focus on information extraction
 - neural memory architectures
 - recurrent neural networks
- 2008–2014 **Diplom Informatik (equivalent M.Sc. Computer Science)**, *Technische Universität Dresden*, Dresden, 1.1 (with distinction, equivalent to first-class honors).
 - *Specialization*: Intelligent Systems
 - *Minor*: Mathematics

2000-2008 **Abitur**, *Goetheschule Ilmenau*, Ilmenau, 1.1.
◦ *Specialization*: mathematics and the sciences.

Diploma thesis

Title *Relation Discovery between Indirectly Connected Biomedical Concepts*
Supervisors Dr. Georgios Tsatsaronis, Prof. Michael Schroeder
Description In this thesis a novel approach for relation discovery in the biomedical domain is introduced. The approach is based on the combination of information extracted from structured and unstructured data, represented by a graph. The constructed graph allows for the easy integration of heterogeneous information and discovery of indirect connections between biomedical concepts using machine learning to identify characteristic graph path patterns.

Teaching

2017 **Supervision of Master Thesis.**
Neural Domain Adaptation for Biomedical Question Answering
2016 **Supervision of Master Thesis.**
Clozing the Gap: Knowledge Base Population by Answering Cloze Queries

Awards

2012 **Scholarship of Germany ("Deutschlandstipendium").**
2010–2011 **DAAD Scholarship.**
Scholarship for an exchange year abroad in Brazil

Software

GitHub <https://github.com/dirkweissenborn>
Jack-the-Reader Open-source framework neural machine reading. Main developer.
<https://github.com/uclmr/jack>
MOOD Open-source tool for joint entity linking and word sense disambiguation. Creator.
<https://bitbucket.org/dfki-lt-re-group/mood>
DBpedia Open source tool for entity linking. Active member (2012 to 2013).
Spotlight <https://github.com/dbpedia-spotlight/dbpedia-spotlight>

Technical Skills

Programming Languages *in descending order of proficiency*
Python, Scala, Lua, Java, C++, C
Deep Learning Libraries
TensorFlow, PyTorch
NLP Libraries
Spacy, FactorIE, NLTK, StanfordNLP

Languages

German **Mother tongue**
English **Fluent**
Spanish **Fluent**
Portuguese **Fluent**
