Dirk Weissenborn

Curriculum Vitae

■■■ Professional Experience

2017	**Research Intern**, *DeepMind*, London.
	○ integration of common-sense and background knowledge into neural natural language understanding systems
since 2014	**Research Scientist**, *German Research Center for Artificial Intelligence*, Berlin.
	○ basic research on machine- & deep-learning for NLP
	○ project&development lead for project on neural information extraction with industry partner SAP funded by the Software Campus program
	○ research in various information extraction projects (entity linking, biomedical concept recognition, question answering)
2013–2014	**Student Assistent**, *Bioinformatics Group, BIOTEC, TU Dresden*, Dresden.
	○ research on relation discovery and question answering in the biomedical domain
	○ co-organization of first round of BioASQ challenge on biomedical question answering
2013	**Mentor for Google Summer of Code**, *Open Source Project DBpedia Spotlight*.
2012	**Student of Google Summer of Code**, *Open Source Project DBpedia Spotlight*.
	○ topical classification on Wikipedia
2011-2012	**Software Developer**, *T-Systems Multimedia Solutions*, Dresden.
	○ development of a recommender system for social network
	○ build management in software project
2008-2010	**Software Developer**, *AvatR*, Dresden.
	○ development of recommender system of personal agent for webservices

■■■ Education

since 2014	**PhD Student**, *German Research Center for Artificial Intelligence*, Berlin.
	○ deep learning architectures for NLP with special focus on information extraction and question answering
	○ integration of background knowledge in neural NLU
2008–2014	**Diplom Informatik (equivalent M.Sc. Computer Science)**, *Technische Universität Dresden*, Dresden, 1.1 (with distinction, equivalent to first-class honors).
	○ *Specialization:* Intelligent Systems
	○ *Minor:* Mathematics

2000-2008 **Abitur**, *Goetheschule Ilmenau*, Ilmenau, 1.1.
- *Specialization:* mathematics and the sciences.

Diploma thesis

Title *Relation Discovery between Indirectly Connected Biomedical Concepts*

Supervisors Dr. Georgios Tsatsaronis, Prof. Michael Schroeder

Description In this thesis a novel approach for relation discovery in the biomedical domain is introduced. The approach is based on the combination of information extracted from structured and unstructured data, represented by a graph. The constructed graph allows for the easy integration of heterogeneous information and discovery of indirect connections between biomedical concepts using machine learning to identify characteristic graph path patterns.

Teaching

2017 **Supervision of Master Thesis**.
Neural Domain Adaptation for Biomedical Question Answering

2016 **Supervision of Master Thesis**.
Clozing the Gap: Knowledge Base Population by Answering Cloze Queries

Awards

2012 **Scholarship of Germany ("Deutschlandstipendium")**.

2010–2011 **DAAD Scholarship**.
Scholarship for an exchange year abroad in Brazil

Software

GitHub `https://github.com/dirkweissenborn`

Jack-the- Open-source framework neural machine reading. Main developer.
Reader `https://github.com/uclmr/jack`

MOOD Open-source tool for joint entity linking and word sense disambiguation. Creator.
`https://bitbucket.org/dfki-lt-re-group/mood`

DBpedia Open source tool for entity linking. Active member (2012 to 2013).
Spotlight `https://github.com/dbpedia-spotlight/dbpedia-spotlight`

Technical Skills

Programming Languages *in descending order of proficiency*
Python, Scala, Lua, Java, C++, C

Deep Learning Libraries
TensorFlow, PyTorch

NLP Libraries
Spacy, FactorIE, NLTK, StanfordNLP

Languages

German	**Mother tongue**
English	**Fluent**
Spanish	**Fluent**
Portuguese	**Fluent**
